YOUR JOURNEY TO A
GLOBAL ONE HEALTH PASSPORT™

PATIENT & USER WELCOME GUIDE

YOUR HEALTH. YOUR DATA. YOUR FUTURE.

Welcome to Reapian — a new approach to connected health.

Life is busy. Healthcare can be complicated. Your health information can become scattered across doctors, laboratories, reports, apps and different healthcare providers.

Reapian was created to help bring these pieces together.

Our goal is simple:

To help you understand your health, take a more active role in your future wellbeing, and securely connect your health information when and where it is needed.

Welcome to Reapian.

01 — WELCOME TO REAPIAN

Your health is one of the most important assets you will ever have.

Yet unlike financial assets, we often don't have a clear view of how our health is changing until something goes wrong.

Reapian is designed around a different philosophy:

ADVANCE. ADAPT. EVOLVE.

Advance your understanding of your health.

Adapt your lifestyle and health decisions as new information becomes available.

Evolve your health journey over time as your circumstances, results and needs change.

Reapian combines digital health assessment, laboratory information, health intelligence and secure data connectivity to help you build a more complete picture of your health.

02 — YOUR JOURNEY STARTS WITH HEALTH-iQ™

Your first step is the **Health-iQ™ Assessment**.

It is designed to help establish an initial picture of your health and lifestyle using information you provide about yourself.

The process is simple and can be completed online.

Your Health-iQ journey

1. REGISTER

Create your Reapian account and establish your secure digital health identity.

2. COMPLETE YOUR HEALTH-iQ ASSESSMENT

Answer a series of questions about your lifestyle, health and relevant circumstances.

3. RECEIVE YOUR HEALTH-iQ PROFILE

Your responses are processed into a personalised Health-iQ profile designed to help you better understand areas of your health that may deserve attention.

4. TAKE THE NEXT STEP

Depending on your profile, circumstances and healthcare needs, your next step may include lifestyle changes, discussion with a healthcare professional, or appropriate laboratory testing.

5. BUILD YOUR HEALTH RECORD

As additional health information becomes available, your Reapian journey can develop beyond your initial assessment.

03 — ONE HEALTH PASSPORT FOR LIFE

Your long-term goal within the Reapian ecosystem is your:

GLOBAL ONE HEALTH PASSPORT™

Your Global ONE Health Passport is designed to provide a connected digital identity for your health information.

Instead of repeatedly starting from the beginning, your health journey can progressively build over time.

Your Reapian ecosystem may connect information such as:

- Health-iQ assessments and profiles
- Laboratory and biomarker results
- Relevant health reports
- Genetic testing information where appropriately authorised
- Health and lifestyle information
- Connected health and wearable information where supported
- Other authorised health information

The intention is to create a **living health profile** that can develop with you throughout your life.

ONE PASSPORT. ANYWHERE. ANYTIME.

Where supported and appropriately authorised, your Reapian identity can help you securely access and share relevant health information across your connected healthcare journey.

04 — YOUR DATA SHOULD WORK FOR YOU

Your health information is valuable.

Reapian is built around the principle that **you should be empowered to participate in how your health information is accessed and shared.**

Your digital health journey is designed around secure identity, controlled access and appropriate consent.

This means your health information can become more useful over time rather than remaining isolated in separate systems.

Reapian's technology infrastructure is designed to connect information while maintaining appropriate controls around identity, access and consent.

Your health information is not just a record.

It can become a resource for better-informed health decisions.

05 — WHEN YOU NEED A HEALTHCARE PROFESSIONAL

Reapian is not intended to replace your doctor or other qualified healthcare professional.

Instead, it is designed to help create a better connection between **you, your health information and the professionals involved in your care.**

Where appropriate, your Reapian journey may connect you with a participating healthcare professional.

A practitioner may be able to use relevant information from your Reapian profile to better understand your circumstances and determine whether additional investigation or testing may be appropriate.

Your healthcare professional remains responsible for professional clinical assessment, interpretation and advice.

06 — UNDERSTANDING LABORATORY TESTING

Laboratory testing can provide another important layer of information about your health.

Where laboratory testing is appropriate, Reapian's **SkyLab™** environment is designed to help connect laboratory services and biomarker information to your digital health journey.

Depending on the service available to you, this may include:

SELECTING YOUR TESTS

Appropriate testing can be discussed with your healthcare professional.

SAMPLE COLLECTION

Your sample is collected through the applicable laboratory or healthcare service.

LABORATORY ANALYSIS

The laboratory processes your sample using its applicable testing procedures.

DIGITAL RESULTS

Where supported, your results can be connected to your Reapian health record.

HEALTH INTELLIGENCE

Your information can become part of a broader health profile, allowing you to follow changes over time.

Important: A laboratory result should always be considered in the appropriate clinical context. Reapian does not replace professional medical interpretation.

07 — YOUR HEALTH JOURNEY DOES NOT END WITH ONE TEST

One of the most important differences between Reapian and a once-off health check is the concept of **continuity**.

Your health changes.

Your lifestyle changes.

Your circumstances change.

Your biomarkers can change.

Your health information should therefore have the ability to develop with you.

Rather than asking:

“What does my health look like today?”

Reapian is designed to help you progressively explore:

“How is my health changing over time, and what can I do about it?”

This is where the Reapian philosophy of:

ADVANCE. ADAPT. EVOLVE.

becomes meaningful.

08 — YOUR HEALTH IS AN INVESTMENT

We often invest in our homes, education, careers, businesses and financial futures.

Your health supports all of them.

Reapian therefore approaches preventative and proactive health from the perspective of **health activation**.

Where appropriate, you may choose to invest in understanding your health today in order to be better prepared for tomorrow.

HEALTH ACTIVATION

A health activation may include actions such as:

- Completing your Health-iQ Assessment
- Understanding your health profile
- Discussing your results with a healthcare professional
- Completing appropriate laboratory testing
- Monitoring relevant biomarkers
- Making lifestyle changes
- Reassessing your health over time
- Building and maintaining your Global ONE Health Passport

The objective is not to encourage unnecessary testing.

It is to encourage **informed participation in your own health journey**.

09 — YOUR NEXT COVERED HEALTH BENEFIT

As the Reapian ecosystem develops, participating healthcare, insurance, employer and other benefit programmes may incorporate health activation services.

This creates an important opportunity:

Your next covered health benefit can become an investment in your future health.

Where a service is covered by an applicable health plan, employer programme, insurer or other benefit provider, the applicable terms of that programme will determine what is included.

Where a service is not covered, you may have the option to access it independently at the applicable price.

Reapian's objective is to make appropriate health information and health activation increasingly accessible, while helping people understand the value of investing in their future health.

10 — THE REAPIAN HEALTH ECOSYSTEM

Reapian is more than a single website or assessment.

It is a connected ecosystem designed to bring different aspects of the health journey together.

HEALTH-iQ™

Personalised Health Intelligence

Your digital health assessment and evolving health profile.

SKYLAB™

Laboratory & Biomarker Intelligence

Connecting laboratory testing and biomarker information to your digital health journey.

GENEINSIGHT™

Genetic Testing Governance

A structured environment supporting appropriate counselling and governance around selected genetic testing services.

RÅSCIA™

Intelligence & Data Infrastructure

The underlying intelligence and data infrastructure supporting the connected Reapian ecosystem.

GLOBAL ONE HEALTH PASSPORT™

Your Connected Health Identity

The long-term destination for your connected digital health journey.

11 — WHAT YOU CAN DO TODAY

You do not need to understand everything about Reapian before getting started.

Simply begin with the next step.

YOUR FIRST STEPS

01 — CREATE YOUR ACCOUNT

Register securely with Reapian.

02 — COMPLETE HEALTH-iQ

Tell us about yourself through the Health-iQ Assessment.

03 — REVIEW YOUR PROFILE

Explore the information generated from your assessment.

04 — DISCUSS WHERE APPROPRIATE

If your profile indicates that further attention may be useful, consider discussing this with an appropriate healthcare professional.

05 — BUILD YOUR HEALTH PASSPORT

As you participate in additional Reapian services, your connected health journey can continue to develop.

12 – IF YOU ARE INVITED BY A PRACTITIONER

If your healthcare professional has invited you to Reapian, you may already have a specific reason for joining.

Your practitioner may use Reapian to help coordinate aspects of your health journey, such as:

- Health-iQ assessment
- Laboratory testing
- Biomarker information
- Genetic testing pathways
- Follow-up information
- Access to relevant health records

Your practitioner will explain which services are appropriate for your circumstances.

You remain an important participant in the process.

13 – YOUR PRIVACY MATTERS

Your health information is personal.

Reapian is designed with security, identity, consent and controlled access as important principles of the platform.

Different services may require different permissions and levels of access.

You should always review the applicable privacy notices, consent requirements and service terms before providing or authorising access to health information.

Where third-party laboratories, healthcare professionals or other service providers are involved, their own applicable policies, professional obligations and terms may also apply.

14 — REAPIAN IS DESIGNED TO GROW WITH YOU

Your first interaction with Reapian may be a simple Health-iQ Assessment.

Over time, your journey may become much more comprehensive.

You may eventually have:

A Health-iQ Profile

Laboratory & Biomarker Information

Professional Health Insights

Longitudinal Health Information

Connected Health Services

YOUR GLOBAL ONE HEALTH PASSPORT™

The vision is not to create another isolated health record.

It is to create a connected health journey that can remain relevant as your life changes.

15 — A SIMPLE WAY TO THINK ABOUT REAPIAN

BEFORE

Your health information may be spread across different places.

Doctor.

Laboratory.

Reports.

Apps.

Personal records.

WITH REAPIAN

Your authorised health information can become part of a more connected digital health journey.

YOU

HEALTH-iQ™

YOUR HEALTH PROFILE

HEALTH SERVICES & LABORATORY DATA

HEALTH INTELLIGENCE

GLOBAL ONE HEALTH PASSPORT™

16 — YOUR HEALTH. YOUR JOURNEY.

Reapian does not ask you to become an expert in healthcare technology.

It simply gives you the opportunity to become more informed and more involved in your own health journey.

Start where you are.

Understand what you can.

Take appropriate action.

Keep building your health information over time.

ADVANCE.

ADAPT.

EVOLVE.

Because your health is not something you should only think about when something goes wrong.

YOUR HEALTH IS YOUR MOST IMPORTANT ASSET.

And it is worth investing in.

WELCOME TO REAPIAN™

ONE HEALTH PASSPORT FOR LIFE

ONE PASSPORT. ANYWHERE. ANYTIME.

Connected Health. Intelligent Data. Better Health.

IMPORTANT INFORMATION

Reapian provides digital health technology and information-management services. It does not replace a qualified healthcare professional, medical diagnosis or professional medical advice.

The availability of specific services, laboratory testing, healthcare professionals, benefit coverage and pricing may vary by location, provider and applicable programme terms.

Always consult an appropriately qualified healthcare professional where medical assessment, diagnosis, treatment or interpretation of health information is required.
