## HEALTH PRACTITIONER WELCOME & ONBOARDING GUIDE

### Introducing the Reapian Connected Health Ecosystem

**GLOBAL ONE HEALTH PASSPORT™**  
**ONE PASSPORT. ANYWHERE. ANYTIME.**

---

## WELCOME TO REAPIAN

Reapian is building a new generation of connected healthcare infrastructure designed to bring together the people, information and technologies that contribute to better-informed health decisions.

At the centre of the Reapian ecosystem is the **GLOBAL ONE HEALTH PASSPORT™** — a continuously evolving digital health identity designed to give individuals a secure and connected way to carry their health information with them throughout their lives globally.

For healthcare practitioners, Reapian provides a digital clinical environment through which authorised practitioners can connect with their patients' health information, diagnostic results and emerging health intelligence and have this information accessible worldwide on your digital device.

The objective is simple:

**To help create a more connected relationship between people, practitioners, diagnostics and health information.**

We invite you to become part of this journey.

# 1. THE REAPIAN VISION

Healthcare information is often fragmented across different practitioners, laboratories, systems and periods of a person's life.

Reapian is being developed to help connect these health assets into a single, evolving digital health ecosystem.

Instead of viewing a laboratory result, health assessment, genetic test or clinical record as an isolated event, Reapian is designed to allow authorised information to become part of a person's continuing health journey.

The Reapian ecosystem brings together:

## **DIGITAL HEALTH IDENTITY**

GLOBAL ONE HEALTH PASSPORT™

## **PREDICTIVE HEALTH INTELLIGENCE**

Health-iQ™

## **BIOMARKER & LABORATORY INTELLIGENCE**

SkyLab™

## **GENETIC TESTING GOVERNANCE**

GenelInsight™

## **INTELLIGENCE & DATA INFRASTRUCTURE**

RÅSCIA™

Together, these technologies form the foundation of the Reapian connected-health platform.

---

# 2. THE GLOBAL ONE HEALTH PASSPORT™

## **ONE PASSPORT. ANYWHERE. ANYTIME.**

The **Reapian GLOBAL ONE HEALTH PASSPORT™** is designed to become an individual's lifelong digital health identity.

It is intended to connect a person with their authorised health information and approved healthcare relationships, while giving the individual greater visibility and control over their health journey.

The Passport can progressively become a central point for health assets such as:

- Health assessments
- Laboratory and biomarker results
- Health trends
- Practitioner interactions
- Genetic testing information
- Medications and allergies
- Wearable and lifestyle information
- Health intelligence
- Other authorised digital health records

A unique patient identity, referred to within the Reapian ecosystem as the **PIP**, provides the underlying identity connection between the individual and their authorised health information.

The Passport is therefore not simply a digital document.

**It is designed as a lifelong, evolving health identity.**

---

## 3. HEALTH-iQ™

### UNDERSTAND YOUR HEALTH BEFORE THE NEXT CLINICAL DECISION

Health-iQ is Reapian's digital health assessment and intelligence environment.

The Health-iQ journey begins with a structured health assessment designed to establish an initial health profile.

As additional health information becomes available, the individual's Reapian health profile can evolve.

Health-iQ is designed to provide a foundation for understanding:

- Lifestyle and general health factors
- Health-related risk indicators
- Laboratory findings
- Biomarker trends
- Relevant health patterns
- Future predictive health intelligence

For practitioners, Health-iQ provides an additional digital layer through which patient information can be considered alongside conventional clinical information.

---

## 4. SKYLAB™

### CONNECTING DIAGNOSTICS TO THE DIGITAL HEALTH JOURNEY

SkyLab is Reapian's digital laboratory and biomarker environment.

Through the Reapian platform, laboratory information can become part of the individual's continuing health profile rather than remaining an isolated laboratory event.

SkyLab is designed to support:

- Digital laboratory test requests
- Biomarker selection
- Laboratory result integration
- Biomarker interpretation and tracking
- Patient result access
- Practitioner clinical review
- Longitudinal health trends

Reapian's initial laboratory integration is being developed with **Ampath** in South Africa, with the broader architecture designed to support future laboratory integrations.

## 5. GENEINSIGHT™

### COUNSELLING-GATED GENETIC TESTING GOVERNANCE

GeneInsight is Reapian's genetic-testing governance environment.

The platform is designed to support a controlled pathway between genetic counselling, patient consent, scheduling and genetic testing.

GeneInsight can support the practitioner/counsellor workflow from:

**Counselling → Patient Engagement → Scheduling → Completion → Testing Authorisation**

This creates an additional governance layer around appropriate genetic-testing pathways.

---

## 6. RÅSCIA™

### THE INTELLIGENCE ENGINE BEHIND REAPIAN

RÅSCIA is the intelligence and application programming infrastructure supporting the Reapian ecosystem.

It is being developed to allow information from different health sources to become increasingly useful as the individual's health profile develops.

The architecture is designed to support areas such as:

- Health-data integration
- Biomarker intelligence
- Predictive health analysis
- Longitudinal trends
- Digital identity
- Practitioner access
- Wearable-data integration
- QR-based health access
- Data governance and auditability

RÅSCIA is intended to operate largely behind the scenes.

For the practitioner, the objective is not to create another complicated technology platform.

**The objective is to make connected health information more accessible when it is needed.**

---

## 7. THE REAPIAN PRACTITIONER EXPERIENCE

Once verified, practitioners receive access to their Reapian practitioner environment.

The Practitioner Clinical Console is designed to provide a central workspace through which authorised patient information can be accessed.

Depending on the patient's available information and permissions, the practitioner may be able to access areas including:

- Patient identification
- Health-iQ information
- Laboratory results
- Biomarker information
- Historical trends
- Genetic-testing workflows
- Patient health information
- Digital health assets
- Reapian health intelligence

The system is designed around authorised access rather than unrestricted access.

**The practitioner sees what they are authorised to see.**

## 8. ACCESSING A PATIENT

Reapian is designed to make patient identification simple.

An authorised practitioner can use the patient's Reapian identification pathway, including the **QR GAI / Health Passport access mechanism**, to connect with the appropriate patient profile.

The underlying PIP provides the identity connection within the Reapian ecosystem.

The intended experience is:

## **ONE SCAN**

**Scan → Identify → Authorise → Access**

This creates a practical pathway between the physical clinical environment and the patient's digital health ecosystem.

---

# **9. BECOME A REAPIAN FOUNDING PRACTITIONER**

## **AN INVITATION TO THE FIRST 50 PRACTITIONERS**

Reapian is establishing a limited **Founding Practitioner Programme** for the first group of verified health practitioners joining the platform.

**The first 50 verified practitioners will be recognised as:**

## **REAPIAN™ FOUNDING PRACTITIONERS**

These practitioners will form the initial professional community supporting the introduction and development of the Reapian connected-health ecosystem.

Being a Founding Practitioner represents an early association with the Reapian platform and its development.

It recognises practitioners who choose to participate during the formative stage of the Reapian journey.

# 10. FOUNDING PRACTITIONER BENEFIT

## COMPLIMENTARY PLATFORM ACCESS FOR LIFE

The first **50 verified Reapian Founding Practitioners** will receive:

**Complimentary Reapian practitioner platform access for life.**

This founding benefit applies to the practitioner's Reapian practitioner account and is subject to the platform's applicable terms of use and verification requirements.

The Founding Practitioner status is limited to the first 50 qualifying practitioners.

Once the first 50 Founding Practitioner places have been allocated, subsequent practitioners will join under the standard Reapian practitioner access model applicable at that time.

---

# 11. YOUR FOUNDING PRACTITIONER CERTIFICATE

Each qualifying Founding Practitioner will receive an official:

**REAPIAN™**

## FOUNDING PRACTITIONER

### CERTIFICATE OF RECOGNITION

The certificate acknowledges the practitioner's participation in the founding group of verified healthcare professionals joining the Reapian platform.

The certificate represents:

- Recognition as one of the first Reapian practitioners

- Participation in the early Reapian practitioner community
- Founding access to the Reapian ecosystem
- Recognition of the practitioner's early adoption of connected digital health technology

The certificate is a Reapian recognition document and does not replace, confer or imply any professional registration, medical qualification, statutory accreditation or regulatory approval.

Professional verification remains subject to the applicable professional and regulatory requirements.

---

## 12. WHO CAN BECOME A VERIFIED REAPIAN PRACTITIONER?

Reapian is intended to support appropriately qualified healthcare professionals and other authorised health practitioners who meet the applicable verification requirements.

Practitioners are required to provide the information necessary for Reapian to establish their professional identity and eligibility for practitioner access.

Verification may include confirmation of relevant professional registration and other information required by Reapian or applicable authorities.

**Registration with Reapian does not automatically constitute verification.**

Practitioner access to clinical functionality is dependent on successful verification.

## 13. HOW TO REGISTER

### STEP 1 – VISIT REAPIAN

Visit the Reapian website platform ([🌐 reapian.com](https://reapian.com)) and select:

**Practitioner / Practitioner Sign-In or use the portal NAVIGATION selector at the top of the INDEX page.**

Follow the practitioner verification and registration pathway.

---

## **STEP 2 – CREATE YOUR ACCOUNT**

Provide the requested registration information, including your:

- Name
- Contact details
- Email address
- Professional information
- Registration information
- Other required verification details

Please ensure that all information supplied is accurate and current.

---

## **STEP 3 – VERIFY YOUR PROFESSIONAL STATUS**

Reapian will process the information supplied during registration as part of the practitioner verification process.

Where required, information may need to be verified against the applicable professional or regulatory requirements.

Your account status will indicate whether your practitioner verification has been completed.

---

## **STEP 4 – ACCESS YOUR PRACTITIONER WORKSPACE**

Once your practitioner account has been established, you can sign in to your Reapian practitioner environment.

Your workspace provides access to the platform functionality available to your account.

# 14. WHILE YOUR ACCOUNT IS BEING VERIFIED

We understand that verification may take time.

During the verification period, your account may operate in **Demo Mode**.

Demo Mode allows practitioners to familiarise themselves with the Reapian platform, practitioner workspace and clinical workflows using designated demonstration patient accounts.

This allows you to explore the platform without waiting for patient activity to begin.

**Your account may therefore provide a complete demonstration experience while professional verification is being finalised.**

Once verification has been completed, applicable practitioner functionality will become available according to your account status.

---

# 15. YOUR FIRST REAPIAN EXPERIENCE

After signing in, we recommend becoming familiar with the following areas:

## 1. Practitioner Profile

Review your practitioner information and account status.

## 2. Practitioner Workspace

Explore your clinical workspace and available tools.

## 3. Patient Environment

Familiarise yourself with how patients are identified and accessed.

## 4. Health-iQ

Explore the digital health assessment and health profile.

## 5. SkyLab

Review the laboratory and biomarker workflow.

## 6. GeneInsight

Where applicable, explore the genetic-testing governance workflow.

## 7. Notifications

Review your practitioner notifications and important account messages.

## 8. Demo Patients

Use the available demonstration patients to experience the clinical workflow and diagnostic tools → use your command panel that is available from the arrow next to your signed in account name at the top left of the web portal platform ( [reapian.com](https://reapian.com)).

---

# 16. THE REAPIAN PATIENT JOURNEY

The long-term Reapian patient journey is designed around a simple principle:

**Build the health profile once – continue building it throughout life.**

A typical journey may begin with:

**REGISTER**

**OR**

↓

**HEALTH-iQ ASSESSMENT**

↓

## HEALTH-iQ PROFILE

## GLOBAL ONE HEALTH PASSPORT™

## LABORATORY & BIOMARKER DATA

## PRACTITIONER INTERACTION

## GENETIC / OTHER HEALTH ASSETS

## LONGITUDINAL HEALTH INTELLIGENCE

The individual's health information can therefore become progressively richer over time.

---

# 17. THE PRACTITIONER'S ROLE

Technology does not replace the professional relationship between practitioner and patient.

***Reapian is being developed to support that relationship.***

The practitioner remains responsible for applying professional knowledge, clinical judgement and appropriate standards of care.

Reapian provides the digital infrastructure through which relevant information can be made more accessible and connected.

**Reapian connects the information.**

**The practitioner brings professional judgement.**

# 18. PATIENT-CENTRED DATA ACCESS

Reapian is designed around the principle that people should have meaningful access to their own health journey.

The GLOBAL ONE HEALTH PASSPORT™ provides the individual with a continuing digital health identity.

At the same time, practitioner access is designed around appropriate authorisation and the applicable privacy and data-governance requirements.

This creates a model in which:

**THE PATIENT CARRIES THE PASSPORT.**

**THE PRACTITIONER PROVIDES THE PROFESSIONAL GUIDANCE.**

**REAPIAN CONNECTS THE HEALTH INFORMATION.**

---

# 19. WHY JOIN AT THE BEGINNING?

The Reapian platform is being introduced progressively.

Joining during this early stage gives practitioners the opportunity to:

- Establish their verified Reapian presence
- Become familiar with the platform before broader patient adoption
- Explore the clinical workspace
- Experience the Health-iQ and SkyLab environments
- Participate in the early practitioner community
- Become part of the Founding Practitioner Programme, where eligible
- Prepare for future patient engagement through the Reapian ecosystem

The early practitioner community will help establish the professional foundation of the Reapian network.

## 20. THE FIRST 50

### FOUNDING PRACTITIONER PROGRAMME

There will be only:

## 50 FOUNDING PRACTITIONER PLACES

Each qualifying practitioner will receive:

**FOUNDING PRACTITIONER STATUS**

**OFFICIAL REAPIAN FOUNDING PRACTITIONER CERTIFICATE**

**COMPLIMENTARY REAPIAN PLATFORM ACCESS FOR LIFE**

The programme is intentionally limited.

It represents the first professional community to formally participate in the Reapian ecosystem.

---

## 21. YOUR JOURNEY WITH REAPIAN

Your journey begins with registration.

**REGISTER**

**VERIFICATION**

**ACTIVATE**

**EXPLORE**

**CONNECT**

**BUILD**

**GROW**

As Reapian develops, additional health technologies, laboratory connections, health-data capabilities and practitioner services may become available.

**Your Reapian practitioner account is designed to provide a continuing connection to this evolving ecosystem.**

---

## 22. GET STARTED

### BECOME PART OF THE REAPIAN HEALTH ECOSYSTEM

If you are a qualified healthcare professional and would like to participate in the Reapian journey, we invite you to register as a Reapian practitioner.

If you qualify for one of the first 50 Founding Practitioner places, your account will be recognised accordingly following successful verification.

**001/050 or 037/050 or 049/050 etc → depending on your successful verification and activation date.**

**Register today.**

**Become verified.**

**Explore the platform.**

**Become part of the Reapian journey.**
