REAPIAN™

YOUR HEALTH IS YOUR MOST IMPORTANT ASSET.

And like any important asset, it deserves to be understood, protected and invested in.

Your health influences almost every part of your life — how you live, work, perform, recover, age and plan for the future.

Yet your health information is often scattered across different doctors, laboratories, reports, devices and healthcare systems.

Reapian is building a different future.

A future where your health information can become more connected, more accessible and more useful to you over time.

BUILD YOUR HEALTH ASSET.

Your health is not a once-off event.

It is a journey.

Your health changes as you move through different stages of life. Your lifestyle changes. Your circumstances change. Your biomarkers change. New technologies become available. New health information becomes available.

The decisions you make today can therefore become part of a much larger picture tomorrow.

ADVANCE. ADAPT. EVOLVE.

Reapian gives you the opportunity to become more informed about your health and progressively build a personal health profile that can develop with you.

YOUR HEALTH INFORMATION HAS LONG-TERM VALUE.

Think about everything you accumulate throughout your life.

Financial records.

Education.

Professional experience.

Property.

Investments.

Your health information is another form of personal value.

It can help you and the healthcare professionals involved in your care understand your health journey over time.

But today, that information is often fragmented.

One laboratory may have your results.

A doctor may have your consultation history.

Another provider may have a different report.

Your wearable may have years of activity information.

Your genetic information may exist somewhere else.

What if these pieces could become part of one connected health journey?

INTRODUCING THE GLOBAL ONE HEALTH PASSPORT™

ONE HEALTH PASSPORT FOR LIFE.

The **Global ONE Health Passport™** is Reapian's vision for a lifelong digital health identity.

It is designed to help connect your authorised health information across your evolving healthcare journey.

Your Passport can become the place where your health journey progressively comes together.

FROM YOUR FIRST HEALTH-iQ™ ASSESSMENT...

to laboratory and biomarker information,

to relevant health reports,

to authorised genetic information,

to connected health and wearable data,

to future health services and technologies.

Your health journey can continue to grow with you.

FROM A HEALTH RECORD TO A HEALTH ASSET.

A traditional health record largely tells you what has happened.

A connected health profile can help you understand **what is happening over time.**

That distinction matters.

Because future health decisions may increasingly depend not only on an individual result, but on the **context, history and patterns surrounding that result.**

Your Global ONE Health Passport is designed around this principle.

YOUR PAST.

Your accumulated health information.

YOUR PRESENT.

Your current health profile and available insights.

YOUR FUTURE.

A stronger foundation for informed health decisions.

YOUR FUTURE HEALTH DECISIONS START WITH TODAY'S INFORMATION.

The future of healthcare will increasingly involve more information.

More biomarkers.

More connected devices.

More personalised health information.

More advanced diagnostics.

More sophisticated health intelligence.

The challenge will not simply be having access to information.

The challenge will be connecting the right information to the right person, at the right time, with the appropriate professional context and consent.

This is where Reapian's connected ecosystem is designed to play a role.

ONE PASSPORT. ANYWHERE. ANYTIME.

Your Global ONE Health Passport is designed to give you a persistent digital health identity that can remain relevant as your health journey evolves.

Where supported and appropriately authorised, it can help connect you with participating:

HEALTHCARE PROFESSIONALS

LABORATORY SERVICES

HEALTH TECHNOLOGIES

HEALTH PROGRAMMES

CONNECTED HEALTH SERVICES

The objective is simple:

Your health information should not have to start again every time your healthcare journey changes.

YOUR HEALTH. YOUR DATA. YOUR DECISIONS.

Reapian is built around the idea that people should be empowered to participate more actively in their health journey.

Your health information is personal.

Your access to it matters.

Your ability to understand it matters.

And your ability to securely share appropriate information with authorised healthcare professionals matters.

The Global ONE Health Passport is designed to support that connection through secure identity, controlled access and appropriate consent.

HEALTH-iQ™ STARTS THE JOURNEY.

Your Reapian journey can begin with a simple Health-iQ Assessment.

It provides an opportunity to reflect on your current health and lifestyle and establish your initial digital health profile.

From there, your journey can develop.

HEALTH-iQ™

Understand your starting point.

SKYLAB™

Connect appropriate laboratory and biomarker information.

GENEINSIGHT™

Support appropriately governed genetic testing pathways.

RÅSCIA™

Connect intelligence, data and evolving health information.

GLOBAL ONE HEALTH PASSPORT™

Build your lifelong connected health journey.

INVEST IN YOUR FUTURE HEALTH.

Investing in your health does not necessarily mean doing more tests.

It means becoming more informed.

It means understanding where you are.

It means taking appropriate action when action is needed.

It means building better health information over time.

And where appropriate, it means working with qualified healthcare professionals to interpret that information and make informed decisions.

YOUR HEALTH IS YOUR MOST IMPORTANT ASSET.

Treat it that way.

THE REAPIAN PHILOSOPHY

ADVANCE.

Understand more about your health.

ADAPT.

Use relevant information to make informed changes.

EVOLVE.

Continue building your health journey as your life changes.

THE FUTURE IS CONNECTED.

We believe the future of health will be increasingly connected.

Connected people.

Connected healthcare professionals.

Connected laboratories.

Connected health technologies.

Connected information.

Connected intelligence.

And ultimately:

ONE CONNECTED HEALTH JOURNEY.

That is the vision behind Reapian.

WELCOME TO YOUR GLOBAL ONE HEALTH PASSPORT™

Your journey does not have to be defined by a single appointment, a single test or a single health report.

It can become a lifelong record of your evolving health story.

START TODAY.

BUILD FOR TOMORROW.

ONE HEALTH PASSPORT FOR LIFE.

ONE PASSPORT. ANYWHERE. ANYTIME.

REAPIAN™

Connected Health. Intelligent Data. Better Health.
